

# **Statement of Work [SOW] – Web Application Penetration Test:**

For KS Security Solution ([KS Security Solution \(kssecsolution.in\)](https://kssecsolution.in)),

18-02-2024

## **1.Description:**

KSP security Pvt. Ltd. will be responsible for conducting a thorough web application penetration test for KS Security Solution. The objective is to identify and address any security vulnerabilities within the web application to ensure its resilience against potential cyber threats and attacks.

## **2.Expectations:**

The client expects LB security to deliver a comprehensive report outlining identified vulnerabilities, their severity levels, and recommended remediation actions. Timely and transparent communication throughout the testing process is also anticipated to address any concerns or queries promptly.

## **3.Scope:**

The scope of work encompasses:

1. Conducting comprehensive reconnaissance and information gathering to understand the web application's architecture and potential vulnerabilities.
2. Performing rigorous vulnerability assessment and penetration testing to uncover security weaknesses such as SQL injection, cross-site scripting (XSS), and authentication bypass.
3. Exploiting identified vulnerabilities to assess their impact and severity on the web application's security posture.
4. Providing actionable recommendations for remediation and enhancing the overall security posture of the web application.

## **4.Schedule:**

The penetration test will commence on 18-02-2024 and is anticipated to conclude by 24-02-2024 . However, the schedule may be subject to adjustment based on the complexity of the web application and any unforeseen circumstances that may arise during testing.

## **5.Pricing Estimation:**

The pricing for the web application penetration test is determined based on KSP security's standard rate of Rs. 370 per hour. An estimated total cost will be provided upon completion of the scoping phase, considering factors such as the size and complexity of the web application.

## **6.Deliverables:**

Upon completion of the penetration test, KSP security will provide the following deliverables:

1. A detailed penetration test report outlining identified vulnerabilities, severity ratings, and recommended remediation steps.
2. An executive summary highlighting key findings and actionable insights for senior stakeholders.
3. Post-test consultation session to discuss findings, address any questions, and offer guidance on remediation efforts.

## **7.Payment Terms:**

Payment terms are as follows:

1. A deposit of Rs. 82000 is required upfront to secure KSP security's services.
2. The remaining balance is due upon delivery of the penetration test report and associated deliverables.
3. Invoices will be issued in accordance with the agreed-upon payment schedule.

## **Agreement:**

By signing this Statement of Work, both KSP security's and KS Security Solution acknowledge and agree to the terms and conditions outlined herein, acknowledging their respective responsibilities and obligations.
